SORA Template v 1.0

Install instruction

What's included in template package

The package for this template included following file and folders:

- ✓ **2 full template file:** (*in xml format*) one is green version and the other is pink version. In these two template files, all script, css and image files are hosted in Sora's Blogger/Google Drive account. So you can start using without worry about hosting these elements.

- ✓ **2 minified template file:** (*in xml format*) for green and pink version, in these two files, you have to upload all css, script files in your own hosting and then link back to template file. Recommend if you have your own hosting.

- ✓ **CSS folder:** contain all CSS files that needed for this template.

- ✓ **JS folder:** contain all javascript files that needed for this template

- ✓ **Images folder:** contain all images that needed for this template

- ✓ **Sample data:** contain a sample blog data file which similar to our demo for your testing.

- ✓ **Plugin code:** contain txt files which are the code of slider, sidebar and other elements... you have to copy and paste content of these file to corresponding widgets in Layout tab to make these elements work.

INSTALL THE TEMPLATE

I. Uploading template

A. If you choose the minified template:

- Upload all CSS, javascript in folders to your own hosting
- Open template file in a word editor such as Notepad, Notepad++ and paste link of files above to the template.
- After finish, upload template to Blogger

B. If you choose the full template file:

- All you need to do is upload template to Blogger

II. Setting the elements

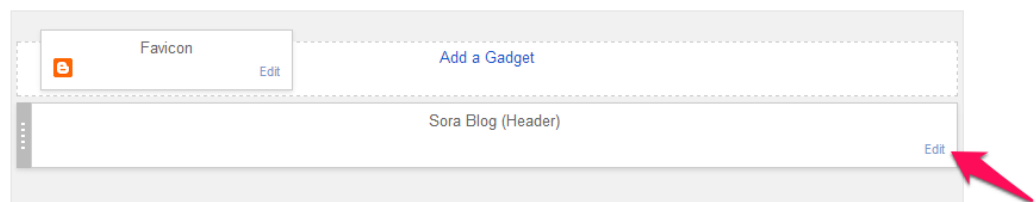

Go to Blogger Dashboard -> Layout tab

1. To set up the header

- ✓ Click on edit link in header widget

Add, remove and edit gadgets on your blog. Click and drag to rearrange gadgets. To change columns and widths, use the [Template Designer](#).

- ✓ Fill the content in dialog

Configure Header

Blog Title

Blog Description

Image

☒ From your computer:
 Không có tệp nào được chọn

☐ From the web. Paste an image URL below.

Placement

☒ Behind title and description

☐ Instead of title and description

☐ Have a description placed after the image

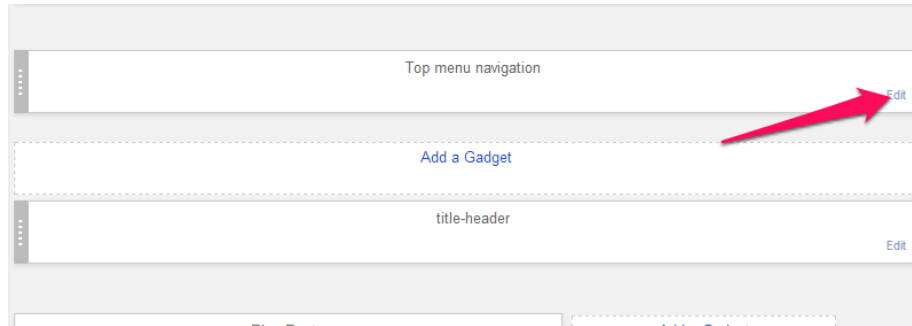

☐ Shrink to fit

Image will be shrunk to 150 pixels wide.

2. To set up the top menu navigation

- ✓ Click on edit link in Top menu navigation widget

- ✓ Open file topmenu.txt in Plugin folder. Add the link to your category/label and category/label name in the code as following

```
<ul class='flexnav' data-breakpoint='800' id='menu-hercules'>
  <li><a href=''>Home<span/></span></a>
  <ul class='sub-menu'>
    <li><a href='url-goes-here'>Category</a></li>
    <li><a href=''>Category</a></li>
    <li><a href=''>Category</a></li>
    <li><a href=''>Category</a></li>
    <li><a href=''>Category</a></li>
  </ul>
</li>
<li><a href=''>Category</a>
  <ul class='sub-menu'>
    <li><a href=''>Category</a></li>
    <li><a href=''>Category</a></li>
    <li><a href=''>Category</a></li>
    <li><a href=''>Category</a></li>
    <li><a href=''>Category</a></li>
  </ul>
</li>
</ul>
```

add link to your category or label

category/label name

- ✓ When finish, copy the whole code and paste to Top menu navigation widget content

Configure HTML/JavaScript

Title
Top menu navigation

b *i*   | Rich Text

paste here

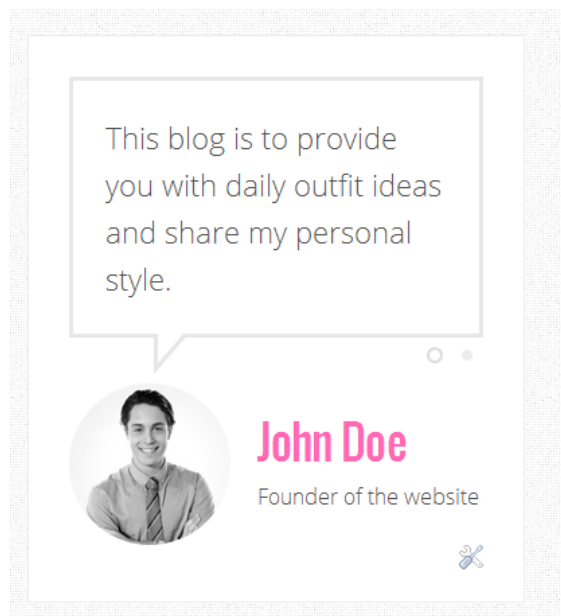

```
<li><a href=''>Category</a></li>
<li><a href=''>Category</a></li>
</ul>

</li>

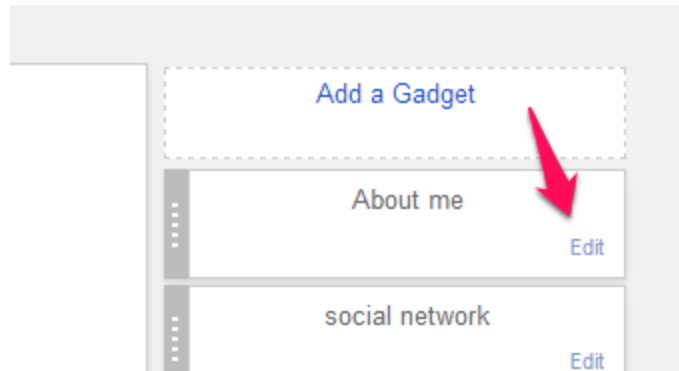

<li><a href=''>Category</a>
<ul class='sub-menu'>
<li><a href=''>Category</a></li>
```

Save Cancel Remove

3. To set up About me widget

- ✓ Click on About me widget

- ✓ Open file About me widget in Plugin folder. Edit it as following

```

lass='flexslider no-bg ' id='flexslider_vsxuiixcgg'>
1 class='slides'>
  <li>
    <div class='testi-item'><span class='testi-info'>This blog is to provide you with daily out
  </li>
  <li>
    <div class='testi-item'><span class='testi-info'>My name is John. I'm a student origina
  </li>
</ul>

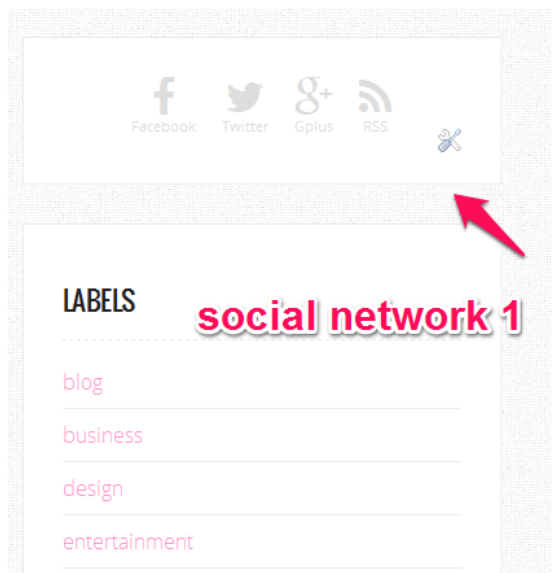

lass='private-image'>
img alt='140x140' class='img-circle' src='http://www.johndoe.hercules-design.com/wp-content/uploads/
3>John Doe</h3>
pan>Founder of the website</span>
  
```

Annotations in the code:

- some text here**: Points to the text "This blog is to provide you with daily out" in the first list item.
- some text here**: Points to the text "My name is John. I'm a student origina" in the second list item.
- your avatar url**: Points to the `src` attribute in the `img` tag.
- your name and title**: Points to the text "John Doe" and "Founder of the website" in the `h3` and `span` tags.

- ✓ Copy and Paste to About me widget content when finish

4. To set up Social network in the right sidebar

- ✓ Click on social network widget

- ✓ Open file socialnetwork1.txt in Plugin folder. Add link to your social networks account as following.

```
rel='tooltip' href='#' target='_blank'>

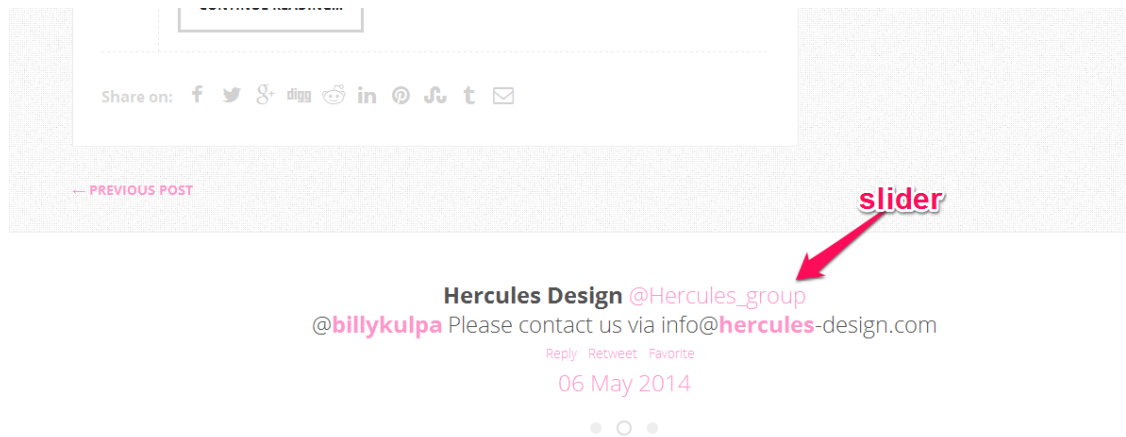

tter' data-original-title='twitter' data-rel='tooltip' href='#' target='_bl.

_gplus' data-original-title='gplus' data-rel='tooltip' href='#' target='_bl.

ds' data-original-title='goodreads' data-rel='tooltip' href='#' target='_bl.
```

- ✓ When finish, copy the whole code and paste to social network widget content

5. To set up Slider at the footer of page:

- ✓ There are 3 slides in this slider, and you can add your own content in each of 3 slide by adding content to SLIDE1, SLIDE2, SLIDE3 widget in Layout

- ✓ For example, you want to edit content of slide 1 in slider, click on Edit link in SLIDE1 widget and paste your content here. That's all.
